

JAD KASHMAR

Computer Engineering Student | Full-Stack Developer

Blat, Jbeil / Al Wardanieh, Lebanon | [+961 81 828 105](tel:+96181828105) | jad.kashmar@gmail.com | jadjashmar.dev

PROFESSIONAL SUMMARY

Third-year Computer Engineering student at the Lebanese American University with hands-on experience in full-stack web development and digital hardware design. Skilled in building responsive, data-driven applications with modern JavaScript and TypeScript technologies, alongside designing finite state machines, synchronous counters, and 74-series logic circuits. Combines analytical engineering problem-solving with strong communication and customer-facing experience.

EDUCATION

Lebanese American University (LAU) - Byblos, Lebanon

Bachelor of Engineering in Computer Engineering | Expected Graduation: 2029

SAT: 1400 | Math: 750 | English: 650

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, TypeScript, SQL

Web Technologies: React.js, Node.js, Express, Tailwind CSS v4, Vite, Motion, HTML/CSS

Databases & Tools: MySQL, SQLite, Google Cloud Firebase Firestore, Altera Quartus II, Digital Circuit Simulation

Hardware Design: 74-Series ICs, Combinational & Sequential Logic, FSM Design

Languages: Arabic (Native), English (Fluent), French (Elementary), Italian (Beginner/Learning)

TECHNICAL PROJECTS

Dormir - Student Accommodation Platform | *Java, Spring Data JPA, SQL*

- Developed a full-stack housing platform for students in Lebanon to discover, compare, and manage university dormitories near major campuses including LAU, NDU, AUB, and USJ.
- Implemented profile-based filtering by university, maximum distance, and essential services such as Wi-Fi, laundry, and parking, with a favorites feature for saved listings.
- Built an administrative dashboard with full CRUD functionality and structured the backend using Java, Spring Data JPA, and SQL database integration.

Smart Classroom Attendance System - Logic Design Lab Final Project | *Quartus II, 74-Series ICs*

- Designed and implemented an automated room-occupancy system featuring a Mealy-type finite state machine, a 5-bit synchronous up/down counter for 0-29 students, and a BCD countdown session timer.
- Optimized the hardware design using JK flip-flops and native complementary outputs from 74LS76 ICs to reduce external gates and overall chip count.
- Validated the complete circuit through K-map derivations, schematic simulation in Altera Quartus II, and physical breadboard prototyping.

TECHNICAL PROJECTS - CONTINUED

SCARECR7W Clothing - Full-Stack E-Commerce Platform | *TypeScript, React 19, Node.js, SQLite, Firebase*

- Engineered an end-to-end e-commerce platform with a secure checkout workflow and real-time catalog search.
- Implemented a dual-tier persistence architecture using SQLite for fast local reads and Firebase Firestore for background synchronization.
- Developed an administrative CMS with Role-Based Access Control (RBAC) and integrated Sentry for full-stack crash diagnostics.

Sector Seven - Formula 1 Telemetry & Data Hub | *JavaScript, React, Node.js, OpenF1 API*

- Built a real-time Formula 1 data hub that streams live timing information using Server-Sent Events (SSE) and official WebSocket/SignalR data sources.
- Integrated OpenF1 and Jolpica-F1 APIs with a localized SQLite caching layer to improve performance and reduce rate-limiting downtime.
- Designed animated UI components for race schedules, historical data, and championship tables.

World Cup 2026 Live - Tournament Tracker | *TypeScript, React 19, Express, SVG*

- Created a full-stack tournament application with an interactive single-elimination knockout bracket, custom SVG connectors, and automated winner propagation.
- Integrated the football-data.org API with an Express in-memory caching layer to support high-traffic requests and match states including extra time and penalty shootouts.

WORK & LEADERSHIP EXPERIENCE

Inflatable Games Operator | *Seasonal Summer Role - 3+ Years*

- Managed daily setup and operation of entertainment equipment while maintaining a safe environment for participants.
- Handled direct customer interactions in a fast-paced setting, strengthening communication and conflict-resolution skills with families and children.

Motorsports Club Member | *Lebanese American University*

- Collaborate with peers on automotive engineering projects and technical discussions through the university's motorsport club.

EXTRACURRICULAR ACTIVITIES & INTERESTS

Competitive Karting: Active driver in the Lebanese Rental Karting Championships, developing focus, tactical adaptability, and high-pressure decision-making.

Motorsport Analytics: Formula 1 enthusiast combining an interest in racing with data-focused software projects such as the Sector Seven telemetry hub.
