

Jad Kashmar

Computer Engineering Student · Full-Stack Developer

Byblos (Jbeil), Lebanon · +961 81 828 105 · jad.kashmar@gmail.com · <https://jadjashmar.dev> · <https://www.linkedin.com/in/jad-kashmar-1980a13b0> · <https://github.com/jadjashmar>

ABOUT ME

I'm a third-year Computer Engineering student at the Lebanese American University, drawn to the field by a love of computers and automation. I learn best by building: most of my projects start as tools that solve my own day-to-day problems, and I enjoy taking an idea all the way from a blank page to a live, tested product. Outside engineering, I race in the Lebanese Rental Karting Championships and volunteer in my community.

EDUCATION

Lebanese American University (LAU), Byblos — *B.E. in Computer Engineering* | Expected 2029

- Relevant coursework: Database Systems (COE 418), Logic Design & Lab (COE 322)

National Evangelical Institute for Boys and Girls (NEIGB), Saida — *Lebanese Baccalaureate, General Sciences*

- Final grade: 15.5 / 20 · SAT: 1400 (Math 750, English 650)

PROJECTS

CourseMap — **Interactive Degree Planner** | *TypeScript, Next.js, Python, PostgreSQL* |

<https://coursemap.jadjashmar.dev>

- Built and deployed a full-stack app that turns a university course-map PDF into an interactive degree planner: students record grades and see their GPA, standing, unlocked courses and a semester-by-semester path to graduation.
- Wrote a Python PDF importer (PyMuPDF) that rebuilds prerequisite graphs from the vector geometry of course-map diagrams, scored against hand-checked answer keys.
- Kept academic rules in data files rather than code, and shipped with about 1,400 unit and 62 end-to-end tests, a security review and deploys on Vercel, Neon and Render.

Sector Seven — **Formula 1 Live Timing Hub** | *JavaScript, Node.js, Express, SQLite, React* |

<https://sectorseven.jadjashmar.dev>

- Connected directly to Formula 1's official live-timing feed over WebSocket, decoding its compressed SignalR messages and rebroadcasting them to browsers with Server-Sent Events.
- Cached schedules and results from the OpenF1 and Jolpica-F1 APIs in SQLite, and built a broadcast-style timing tower in React and Tailwind.

SCARECR7W — **E-Commerce Platform** | *TypeScript, React, Express, SQLite, Google Cloud Run*

- Shipped a streetwear store with checkout, search and a role-based admin CMS, hardened with rate limiting, token sessions, input validation and Sentry.

Also built: *Dormir*, a dorm-finder for students near LAU, NDU, AUB and USJ (Java, Spring Data JPA, SQL) · *World Cup 2026 Live*, a live-scores tracker with an interactive knockout bracket (TypeScript, React, Express) · *Smart Classroom Attendance System*, a logic-design lab project with a Mealy FSM and 74-series ICs (Quartus II)

EXPERIENCE

Inflatable Games Operator | Seasonal, Summers 2023 – Present

- Ran inflatable attractions safely in a busy setting, explaining rules clearly to children and parents and calmly resolving disputes.
- Handled customer payments and cash, and negotiated prices directly with parents.

Member — **LAU Motorsports Club** | Present — help organize club events and take part in them.

VOLUNTEERING

- **Olive tree planting, Majdelyoun Municipality:** planted olive trees in the Greater Majdelyoun area.
- **Clothes for a Cause, NEIGB:** helped organize a class clothing drive for people in need in winter.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, C++, SQL
- **Web & data:** React, Next.js, Tailwind CSS, Node.js, Express, FastAPI, PostgreSQL, MySQL, SQLite
- **Tools:** Git & GitHub, Docker, Vitest, Playwright, Vercel, Render, Cloudflare, Quartus II

SOFT SKILLS

- **Presentation & public speaking:** confident presenter with a clear, engaging speaking voice.
- **Clear explanation:** break technical problems into small, working steps, the way I taught myself to code.
- **Patience:** 3+ summers keeping children and parents informed and calm in a busy setting.
- **Self-directed learning:** taught myself modern web development by building and shipping real apps.

LANGUAGES & INTERESTS

Languages: Arabic (native), English (fluent), French (elementary), Italian (beginner)

Interests: competitive karting (Lebanese Rental Karting Championships), Formula 1, web design
